

MINDSYSTEMS
ENGINEERED SOLUTIONS & APPLICATIONS

COMPANY PROFILE

Presentation

ABOUT OUR COMPANY

Mind Systems is technology driven country providing applications and solutions to mining and industrial clients. We are focused on cutting edge applications that enhance safety, efficiency and low cost of production. We use data analytics to provide real time insights on performance gaps and opportunities for crucial and informed decision making. By leveraging real-time data processing and analytics, our clients are able to swiftly interpret data trends and patterns, thus making proactive and strategic operational decisions

VISION & MISSION

Vision

- ★ A leading engineered solutions provider through digitalization and data analytics to support mining and industry clients.

Mission

- ★ Transform our clients to be data driven for strategic decision making.

OUR CORE VALUES

Integrity

We are committed to conduct our business in a moral and ethical manner as we interact with our suppliers and customers.
We are transparent and accountable for our actions.

Innovation

Critical thinking and ideation are key elements of our approach to problem solving and creating new solutions.
Continuous improvement is embedded in our processes and systems

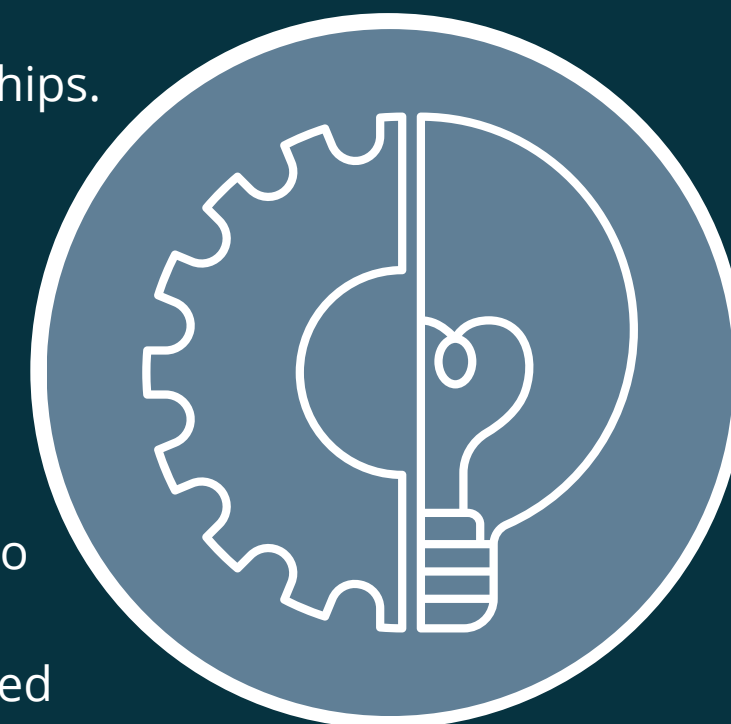

Collaboration

Our world is connected and we deliver our solutions through proven technology partnerships.
We tap into a diverse network of expertise to create value for our customers.

Excellence

Our employees are committed and motivated to make an impact in their engagements.
We deliver consistent results through entrenched processes and systems.

OUR COMPANY PROCESS

We do not make assumptions; all businesses are unique and different and driven by a culture built over several years. Our approach is to listen and understand the customer's challenge and together we create the end statement. To achieve that we must map the situation as is and then develop a solution from our array of solutions and technology partners. Our approach to a solution is in the context of an intergrate system where variables are connected, interrelated and influencing how a system will function and perform. Project management is key element of all our assignments. We are people driven and our employees are trained to implement and support our applications and solutions from cradle to grave.

OUR PRODUCTS & APPLICATIONS

Technology.Digitalization.Insights

Energy

Energy efficiency systems and reduction of CO2 emissions.
Hybrid electric vehicle retrofit for mining applications.
Concentrated Solar Plant solutions

Mine Safety

Underground Mining Cap Lamps.
Employee fatigues prediction and monitoring systems.
Pedestrian / mobile machinery detections systems.
Rock bolts
Underground gas detection

Remote Monitoring Services

In the field of digitalization there is a lot of information and data embedded in manufacturing and mining equipment
We deploy augmented reality for remote maintenance support through collaboration with subject experts.

Data Analytics >> AI

We mine data and manipulate it to provide essential information on conditions of equipment and develop trends that can be used for pre-emptive maintenance interventions
Similarly positive trends can be used for proactive planning to maximize on opportunities

OUR TECHNICAL PARTNERS

EKU Power Drives

Germany based technology company providing energy efficiency systems and platform for remote equipment monitoring.

AVUX

Zimbabwe based company providing technology and integration on mine safety and communication systems.

Nerospec

A South African company providing cutting-edge technology for connected mining machines.

BUNDLAR

A USA based technology partner that provides augmented reality solutions for all business needs.

BUSINESS SUPPORT SERVICES

People.Process.Impact

Business re-engineering

We use business process reengineering to improve the performance of key processes that impact on service to customers or production output. The ultimate objective is to reduce cycle times and lower operational costs by eliminating non productive activities.

Project Management

Project management is a core value stream of our business. We provide project administration and support service through KEY^360 Project Management platform to execute projects

Business Improvement

We use SixSigma and Lean Manufacturing concepts to streamline operations and increase efficiencies.

Coaching & Mentoring

People are essential to service delivery and high performance. We use coaching and mentoring techniques and methodologies to elevate individual employees to reach their potential

INSPIRATIONAL QUOTES

“Success is not final; failure is not fatal: it is the courage to continue that counts.”

THANK YOU

We look forward to working with you
